

**FLASHFORGE FILAMENTS**  
Quality Guaranteed, Smart Choice

## New Formulation · New Material

Use brand-new imported raw material, coupled with exclusive formulation, making Flashforge filament a fantastic solution to edge warping problem for ABS filament printing.

## Safer & More Eco-friendly

Passed international eco-friendly test certificates as RoHS and PAHs, making printing safer and more eco-friendly.

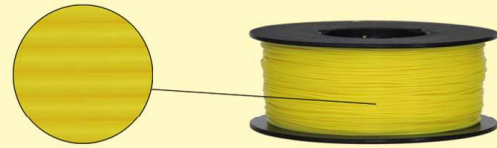

## Durable for Storage · Better to Use

Adopt new damp-proof and anti-crack formulation, increasing storage time after sealing off. We hope you can make full use of each inch of the filament.

## More Precise & Stable

Passed high-precision laser diameter measuring test, guaranteeing the stability ( $1.75 \pm 0.02\text{mm}$ ), perfectly solving filament stuck and skid problems.

## New Production Process · High Purity

Experience strict and advanced process control in the dust-free workshop, preventing any possibility of dust mixing. Say goodbye to extruder jams.

## Filament Series ABS / PLA / HIPS / PVA

# 2015 Roadmap of Flashforge Filament

## Unique features of filament

**ABS :** Owing to its stability, the products printed are less likely to be deformed. It also boasts its light smell. It is harmless to human and eco-friendly. After opening it, the filament can be stored for more than 3 weeks without any damage and enjoy a stable printing effect.

**PLA:** It boasts its flow stability and its eco-friendly nature for its material of corns.
